[estelle.specht@gmail.com](mailto:estelle.specht@gmail.com) / +44 7748833631

### Executive Summary

Junior software developer with knowledge of front end software development and key UX principles in particular when designing with accessibility of the user in mind. I have competency in the top three programming languages; CSS, JavaScript & Python, having coded from day one, whilst working on the five projects to acquire the skills for this role. I'm also able to access databases and use tools like Bootstrap, Django, JQuery, PyTest & Jest. Know how to test code and how development teams work.

In the past whilst working in event management I have developed soft skills namely responding to customer queries by phone and email. Attending client meetings and liaising with conference venues to bring together an event within a budget and deadline. I think they are very useful skills when working in a collaborative development environment.

### Education

Jan 2023 - Present	Code Institute	Dublin, Ireland (Remote)
